Dorothy Atwood

In 2013, **Dorothy Atwood** was the co-founder of the Lake Oswego Sustainability Network. As the co-chair of the organization's School and Education Action Team, her goal is helping to implement sustainability practices in the schools and curriculum. One key to her success has been her ability to merge advocacy with action. She doesn't just talk about the importance of sustainability, she makes change happen, in the school district and in the community.

When the pandemic forced schools to move learning out of the classroom, she found ways to adapt her message of action to a virtual format. As an indication of her commitment to community service, Dorothy also serves as a member of the Board of Directors of the Hunger Fighters Food Pantry. As an indication of her commitment to community service, the city of Lake Oswego recognized her as an Unsung Hero in 2019.
